

The goal that I want to accomplish in the next 5 years is to be a Health administrator in a hospital or clinic (STEM). I want to work in the field of addiction because I know how important it is to care for those with addiction. Education is important because This Degree will help me to have a successful career in the next 10 years. I will mostly likely use technology when it comes to my career because my career involves technology. I am very dedicated to my goal of becoming a Health Administrator. I want to open up a business and become an entrepreneur. I want to use my kindness to help people all around the world and make it an inclusive place. I want to open up a business specifically for the vulnerable populations such as the homeless and the elderly.
